Singing Herbststern

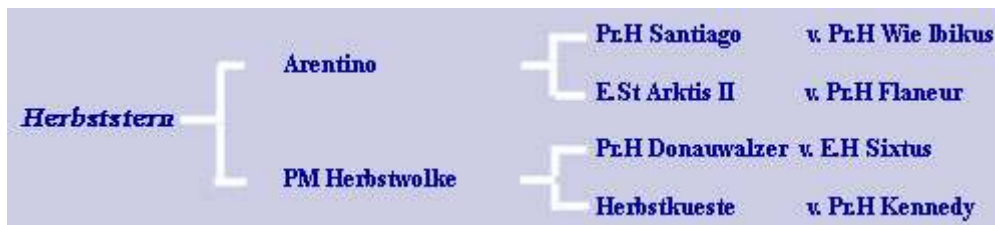

By Arentino
Out of P.M Herbstwolk
By Pr.H Donauwalzer

Colour:	Black
Born:	17.04.2009
Sex:	Filly
To Make:	16,2 h
Passport:	English

Breeder:
The Singing Stud
Ross-On-Wye
Herefordshire
HR9 7RG
England

Mare Family:
T1401Herbstlich
Gestuet
Schomel/Panker

Wow what a stunning filly, she is just as amazing as her full brother Singing Herbstglanz. Herbststern is just as powerful in movement like Glanz and like her wonderful mother was. This is what we always thought we would breed when seeing her mother at the auction in Neumunster Germany and Herbstwolke proved to us that she was the best always producing top quality no matter who the stallion was. She was special chosen for Arentino and these two wonderful horses bloodlines just worked so well together. Herbststern will be staying at The Singing Stud to join the herd as a broodmare as her mother sadly died when she was only two month old. We hope Stern will be able to replace her mother and bred the same amazing wonderful sports horses as Herbstwolke always did.

Herbststern's sire Arentino was competed in Prix St. George dressage and did also really well in show jumping. Arentino's Sire Santiago by Wie Ibikus and out of the foundation mare Schwalbelied was Champion of his grading in 1980 and was a very substantial big framed grandson of the legendary stallion Ibikus, which went on to become a very good show jumper. Wie Ibikus himself produced a big number of high successful dressage horses competing up to Grand Prix. Santiago produced some outstanding broodmares and the value can be seen in his offspring's competition results.

Arentino's Dam Arktis II presents herself as one of the valuable broodmares of the Trakehner breed, being a full sister to the stallion Arogno, sire of the stallions Schwadroneur (now dead) and Anky's stallion Partout. Arktis's offspring are doing well in 3-day eventing and dressage competing in Prix St. Georges.

Herbstwolke was a dynamic filly with a tremendously swinging and almost ostentatious movement due to her impressive conformation. She was eight times Champion in her only year shown and graded with very high impressive marks, which gained her Premium mare status.

The modern pedigree combines the mare families of Donau and Herbstlicht and her dam produced the approved stallion Heidsieck by Tanzmeister in 1999, which has started a very promising dressage career.

Future jewel for dressage and breeding, this mare has a wonderful combination of the genes of the leading sires Sixtus, Kennedy, Michelangelo and Ibikus. If you look into the 3rd generation you will also find outstanding bloodlines for dressage and for high level breeding too.

Donauwalzer was awarded a premium at his grading and is the most impressive son of Elite stallion Sixtus. This wonderful chestnut stallion is very noble, athletic and shows the most powerful and elastic trot with a wonderful walk and uphill canter. His mother Donauflut by Ibikus is one of the youngest of her legendary father and founded her own branch of the famous Donau-family. Grandmother is Donauflamme a very typical daughter of the world famous sire Habicht. Donauwalzer represents an outstanding line breeding to Ibikus and to Habicht, two of the most famous sires for breeding and competition within the last 50 years.

Michelangelo founded besides Mahagoni the second line of the unforgotten Pastur xx. Inselkonig, who was a popular Sire in the Hannoverian breed and the American Trakehner breed too.

The Herbst-family counts among the most successful, valuable and proven families of the Trakehner breed, producing great sires such as Herzzauber, Herzkristall, Herzbube, Herbstruf, Herzkonig, Herbststurm and great dressage horses like the Olympic star Hirtentraum.

Herbststern will be staying at The Singing Stud to join the herd as a broodmare as her mother sadly died when she was only two month old. We hope Stern will be able to replace her mother and bred the same amazing wonderful sports horses as Herbstwolke always did.
